Charlene,

Thank you for your review. I have finalized the document pending LACo FD concurrence.

Attached are the final draft documents which incorporate your comments, as well as a redline, which addresses Katie's comments.

I wish you had informed me sooner regarding our need to translate these documents, as Alejandro is out for the next few days. We are looking to our other resources, as we are interested in getting these packages out as soon as possible.

Tony,

Please review and provide comments or concurrence.

The sooner that we can have these documents finalized and approved, the sooner we will be able to start translation and compiling of the 43 packages.

Thank you,

Michelle

Draft Final versions have today's date.

Redline versions have 083116 date.

Hi Michelle,

Attached are my edits in track changes. We have thought about it over here and suggest providing the tox facts for the 4 metals of concern only.

Do you think Alejandro can translate the documents so we can get them out fairly soon? Our process can take another week to contract it out...

Best regards,

Charlene

I did not hear back about the rescheduling of this call, however, I would really appreciate review and any comments on the attached documents so that these can be finalized and the packages can be put together. My resources were set aside this week to do this, but are now be diverted while awaiting the final documents. Please review and provide comments and/or concurrence ASAP.

Thank you,

Michelle Rogow

**Subject:** Cover letter and fact sheet for residential package

Charlene and Tony,

I am thrilled to be able to present you with the draft final cover letter and fact sheet for the residential package. This has been through our technical and public information review. Please review and edit in track changes, so that we can finalize this. Hopefully it meets our (and the residents) needs. Please let me know if there is anything missing or that we need to work on. We now have the ServPro reports and are ready to put the packages together.

These two documents will need to be translated, but at Charlene's suggestion, we will use the ATSDR ToxFAQs for the metals information.

Hopefully you can review and we can discuss on our weekly call.

Regards,

Michelle
